**Designed for Disaster Response**

**Designed to move where & when you need it**

**Designed to be learned**

Our HDT Fully Integrated Rapid Response 305 Shelters are designed specially for the rigors of responding to Climactic Disasters, Natural Calamities, Emergency Response and other Disaster related and human-inflicted response situations.

It is our aim to develop a fully integrated on-site base camp that integrates Command & Control, Medical Support as well as responder well-being functions and demands.

HDT shelters are also modular and highly expandable. As space and responder requirements increases, HDT rapid response shelters can be expanded to meet increased demands.

As quick response is integral, mobility issues have been resolved with HDT trailer systems.

Designed to be taken on-site to most locations, it makes the already portable HDT systems even quicker to deploy.

We offer exceptional training and support for our products to ensure that users are completely prepared to use them in the field.

We are available worldwide: in person, in the field, online, side by side with you.

- Continuous training for rotating crews
- Complete operator training on all new equipment
- Training for in-field maintenance and repairs

Engineered to move with you
